

## Creative Homework Projects for our Home Learning Heroes!

2F and 2M

The children in Key Stage One will be taking part in 'Creative Homework Projects' that we would like them to complete over the coming weeks. The project for this half term is 'Muck, Mess, Mixtures and Monsters'.

We would really like to see what the children have done at home and ask that, during this unusual time, you **send in pictures via email ([homelearning@catshillfirst.worcs.sch.uk](mailto:homelearning@catshillfirst.worcs.sch.uk)) or photographs with your child**. This needs to be done by **Monday 19th October** so that the children can share and celebrate their hard work before the end of the half-term. We look forward to when children can bring in their projects again and we do hope that this is in the near future.

As always, we ask that the projects reflect around six weeks' worth of work and demonstrates the children's own work, although we really appreciate your support in helping them to complete their homework. The children should complete at least one piece of work but may wish to complete more if they would like.

May we take this opportunity to thank you for your  
continued support.

Mrs Mercer, Mrs O'Brien

Leanne and Becky

### **Cooking**

Work with an adult to produce your own meal or bake a cake. Maybe you could use Roald Dahl's revolting rhymes recipe book. Take a photo of your food.

### **Shopping**

Go shopping and find a food that you have never tried before. Once you have tried it, write about what it tastes like, what it looks like and whether you would recommend it to someone else to try. You could make your own food mixture.

### **Measuring**

In the bath, use a measuring jug to measure different amounts of water. Write some measure problems to solve and email them into school for your friends to complete.

### **Get creative**

Create some potions using empty bottles. Your potion may contain water, glitter, small objects or sequins. You decide what could go in your potion. What is it for? What is it called?

### **Science**

Set up a melting experiment. Take two or three glasses and fill them with the same number of ice cubes. Put them in different places and see which melts first. Do the ice cubes melt faster if you stir them? Present your investigation in any way you like.

### **Visit**

Visit a science museum (if you can) and see what you can discover about mixtures. Write up an account of your day.

### **Library visit**

Find non-fiction books at home (or in the local library) about muck, mess and mixtures.

### **Art**

Create a monster! A costume, a painting, a collage, a mask, a model! Take your pick!

### **Poem**

Write a poem about muck, mess, mixtures and monsters. Present your poem using art work and exciting adjectives.
