Unlocking the Learning

We are looking forward to receiving some fantastic examples of home learning. To support any children who find it more challenging to achieve their home learning we will be offering online support through our daily Google meet until we are all back together in school from Monday 4th April. We believe it is very important that every child has the opportunity to engage with learning at home. If you have any problems or concerns please do not hesitate to contact us via email above or epraise.

The project for this half term is "Scrumdiddlyumptious". We would like these to form further tasks the children can complete while we are in lockdown and school is shut to all but key worker children. These tasks will not be set as part of our online learning and will give you the chance to really develop the children's understanding of our topic of food.

We look forward to seeing the results and would like all the children to share their work via email by Monday 22nd March so that we can share and celebrate each other's talents before the end of term. Thank you for your continued support.

Write an imaginative story which starts..."You are not going to eat me are you?" said the How will it develop? Are you eaten at the end, or saved?	Research a festival that involves eating a special type of food and make an information booklet about it. There are lots to choose from. Can you make the food as well?	Make a fabric dye from a strongly coloured fruit or vegetable. Try beetroot, carrots, tea or spinach. Dip-dye an old white t-shirt. What happens?
Write a shopping list for your family's weekly menu and calculate how much it will cost. Don't forget to look at the fair trade options.	Make an alphabetic list of foods from A to Z. Is it possible? Can you find an interesting fact about some or all of the foods? Where does it come from? Is it a delicacy in some countries?	Design and make an exciting sandwich. Bring a photo of it into school for everyone to see. Maybe we will all go home and make it too?
Keep a food diary to record the different types of food you eat over the week. Report back, in your opinion, has your family got a balanced diet? If not how could you change some of the meals to make it more balanced?	Plan yourself a weekly exercise regime and encourage a parent or carer to do it with you? Research new exercises you can try. Keep a record of your achievements. Did you manage to exercise every day?	Make a dish from a recipe book and take photographs to share back at school. Ask your family to rate their meal, did they enjoy it or not? (Remember to wash your hands before you get started!)

As scientists we will be studying plants.

As writers we will be studying the texts of *Dustbin Dad* and *Peter Rabbit*.

As mathematicians we will be learning about measures, fractions and money.

As geographers we will be learning about land use, trade links and the journey of food to our plate.

**Year 3
Spring 2
Scrumdiddlyumptious**

As designers we will be learning about a healthy and varied diet and making healthy sandwiches and snacks.

Using our computing skills we will be creating animations.

As artists we will be studying drawing and how to sketch different foods like *Jan Davidsz. de Heem* did.

In PHSE we will be learning about living in the wider world.

In PE we will be playing invasion games such as netball, football and rugby

In music 3S will be learning the cornet on Fridays.

Important information
PE is on Wednesday
Forest School is on Friday for 3FC.

In RE we will be learning what the Trinity is and why it is important to Christians.
