BBC Teach animation experts

What makes a great animation?

Remember to plan your **characters, setting and events** using a storyboard.
Make **small changes** between frames so your animation is consistent.

VOCABULARY

animation	a technique used to make objects or drawings appear as if they are moving
stop-frame	a sequence of pictures (frames) that create the illusion of movement when played
illusion of movement	make something look as if it is moving when it is not
playback	reproducing sequences of pictures or sounds after recording them
storyboard	sequence of drawings to plan your animation
onion-skinning	a faint image of the previous frame so you can track your animation

iMotion

- > new movie
- Give it a title
- > manual
- > start

onion skin - so you can see where your object was in the previous frame

grid - so you can place objects accurately
